

I'm a highly motivated **Senior Web / UI / UX Developer / Designer** with 20 years of experience.

I'm passionate about UI, UX, IA, IxD design and front-end development. I have been creating low/high fidelity mockups, developing wireframes, performing UX usability A/B testing, converting designs to functional pages, testing and maintaining multiple web projects for 13 years at Cotton Incorporated while leading the team.

I also enjoy working with complex data in object-oriented programming with using latest modern technology. I also work closely with project leaders on the research investigation and qualification of user interface innovation opportunities, providing guidance on changes in the industry which may impact business's performance.

If graphic design is art, then user interface design is science. I'm confident that I can provide a high-level user experience strategy and best practices of UX/UI design with my technical skills for cross-browsers and all different digital platforms.

My previous working experience and my recent education in MBA in Information Technology enables you to add an analytical, insightful, and performance-driven professional to your team.

I am very excited about making a contribution in this position and am eager to advance the success of your company.

I have enclosed my résumé, which further details my professional achievements.

Thank you for your time and consideration.

Sincerely,

Sungae Park
