

I'm a highly motivated Senior Web / UI / UX Developer with 20 years of experience.

My experience at Cotton Incorporated, where I gained almost 13 years of experience with leading an agile web development team of 6 diverse developers, has not only strengthened my technical skills, it strengthened my team-focused leadership and web project management skills.

I interact and collaborate with other global marketing team in overseas for statistics and data for the periodical reports such as supply insight chain reports, press release, and monthly economic letter and publish advertisement media files with SEO strategies to achieve a maximum ROI. And, I work closely with back-end engineers and project leaders on the investigation and qualification of user interface innovation opportunities, providing guidance on changes in the industry which may impact business choices.

My academic background in Information System and recent education in MBA in Information Technology enables you to add an analytical, insightful, and creative motivator/ performance-driven professional to your team. Throughout my career I have demonstrated a tremendous ability to support and maintain numerous business objectives. I have maintained high levels of professionalism in my services by delivering topnotch solutions for website development, testing, deployment, and maintenance of corporate, retail, global, secure e-commerce websites.

In addition, I'm a creative graphic designer who can deliver a high-level user experience strategy and a front-end engineer who deliver functionality of innovative modern technologies and also a database administrator who can build back-end data structure and integrate it with the front-end technologies.

I have enclosed my résumé, which further details my professional achievements.

I look forward to speaking with you to discuss my interest in working for your company and contribution I would bring to the position.

Thank you for your time and consideration.

Sincerely,

*Sungae Park*
