CORPORATE / FIBER PRODUCT CONSUMER SUSTAINABILITY

/fiber

We focus our efforts on these key areas:

COTTON FARMING PRACTICES
Supporting a wide range of agricultural research designed to help reduce cotton's environmental footprint and improve its profitability.

COTTON FIBER MANAGEMENT
Using HVI® data combined with advanced software allows users to improve spinning processes and end-product quality.

COTTON FIBER AND COTTON PRODUCT TESTING
Providing cotton fiber, yarn and product testing recognized by the AATCC and ASTM for Cotton Incorporated research and development is the role of the Product Evaluation Laboratory (PEL).

RBTN

REGIONAL BREEDERS TESTING NETWORK

ABOUT TRIAL DATA FIBER SAMPLE SUBMISSION PUBLICATIONS CONTACT US

REGIONAL BREEDERS TESTING NETWORK

The Regional Breeders Testing Network (RBTN) is a multi-environment trial (MET) conducted each year on conventional germplasm lines. Previous to initiation of the RBTN, public breeding programs lacked a single-year MET due to resource limitations, but now the RBTN serves to fill the need of a MET and does so at the nominal cost of conducting a single location trial for each participating scientist. With the support of Cotton Incorporated, numerous cotton scientists routinely evaluate conventional germplasm collecting data on yield and fiber quality as well as biotic/abiotic stresses such as nematodes, tarnished plant bug, fusarium and verticillium wilt, drought, and heat tolerance.

PUBLICATIONS

FIBER SAMPLE SUBMISSION

All RBTN participants must use the fiber submission form available online from Cotton Incorporated for all RBTN fiber samples. ...
